Preface	xiii
Acknowledgments	xvii
K. G. Ramanathan, S. Minakshisundaram, <i>J. Indian Math. Soc.</i> <b>34</b> , (1970), 135–149.	xix
Tauberian theorems on Dirichlet's series, <i>J. Indian Math. Soc. (N.S.)</i> <b>2</b> , (1936), 147–155.	1–9
On the extension of a theorem of Caratheodory in the theory of Fourier series, <i>J. Indian Math. Soc. (N.S.)</i> <b>2</b> , (1937), 314–320.	11–17
The Fourier series of a sequence of functions, <i>J. Indian Math. Soc. (N.S.)</i> <b>2</b> , (1937), 321–323.	19–21
A Tauberian theorem on $(\lambda, k)$ -process of summation, <i>J. Indian Math. Soc. (N.S.)</i> <b>3</b> , (1938–39), 124–130.	23–26
On V. Ramaswami's Tauberian theorem on oscillation, <i>J. Indian Math. Soc. (N.S.)</i> <b>3</b> , (1938–39), 131–135.	27–31
On an infinite system of non-linear integral equations, <i>Proc. Indian Acad. Sci.</i> <b>8</b> , (1938), 238–242.	33–37
On an infinite system of non-linear integro-differential equations, <i>Proc. Indian Acad. Sci. (A)</i> <b>9</b> , (1939), 410–418.	39–49
On the theory of non-linear partial differential equations of the parabolic type, <i>J. Indian Math. Soc. (N.S.)</i> <b>3</b> , (1938–39), 237–247.	51–60
On non-linear partial differential equations of the parabolic type, <i>Proc. Indian Acad. Sci. (A)</i> <b>9</b> , (1939), 479–494.	61–77
On non-linear partial differential equations of the hyperbolic type <i>Proc. Indian Acad. Sci. (A)</i> <b>9</b> , (1939), 495–503.	79–87

On generalised Tauberian theorems, <i>Math. Z.</i> <b>45</b> , (1939), 495–506.	89–101
On the roots of a continuous non-differentiable function, <i>J. Indian Math. Soc. (N.S.)</i> <b>4</b> , (1940), 31–33.	103–105
On the expansion of an arbitrary function in a series of eigenfunctions of boundary value problems, <i>Proc. Indian Acad. Sci., Sect. A</i> <b>12</b> , (1940), 462–465.	107–110
A note on the theory of infinite series, <i>Math. Student</i> <b>9</b> , (1941), 78–81.	111–115
On the expansion of an arbitrary function in a series of eigenfunctions of boundary value problems II, <i>J. Indian Math. Soc. (N.S.)</i> <b>5</b> , (1941), 103–108.	117–121
On expansion in eigenfunctions of boundary value problems III. The summability problem, <i>J. Indian Math. Soc. (N.S.)</i> <b>6</b> , (1942), 153–167.	123–137
Studies in Fourier Ansatz and parabolic equations, <i>J. Madras Univ.</i> <b>14</b> , (1942), 73–142.	139–186
Studies in Fourier Ansatz and parabolic equations, <i>J. Indian Math. Soc. (N.S.)</i> <b>6</b> , (1942), 41–50.	187–195
On expansion in eigenfunctions of boundary value problems IV, <i>J. Indian Math. Soc. (N.S.)</i> <b>7</b> , (1943), 17–24.	197–203
On expansion in eigenfunctions of boundary value problems V, <i>J. Indian Math. Soc. (N.S.)</i> <b>7</b> , (1943), 89–95.	205–211
On expansion in eigenfunctions of boundary value problems VI, <i>Bull. Calcutta Math. Soc.</i> <b>35</b> , (1943), 81–84.	213–217
Fourier Ansatz and non-linear parabolic equations, <i>J. Indian Math. Soc. (N.S.)</i> <b>7</b> , (1943), 129–142.	219–230
A new summation process, <i>Math. Student</i> <b>11</b> , (1943), 21–27.	231–237

A note on the theory of Fourier series, <i>Proc. Nat. Inst. Sci. India</i> <b>10</b> , (1944), 205–215.	239–249
On the differentiated series of eigenfunctions, <i>J. Indian Math. Soc. (N.S.)</i> <b>8</b> , (1944), 75–78.	251–253
Notes on Fourier expansion (I), <i>J. London Math. Soc.</i> <b>20</b> , (1945), 148–153.	255–260
On a Tauberian theorem of K. Ananda Rau (with C. T. Rajagopal), <i>Quart. J. Math., Oxford Ser.</i> <b>17</b> , (1946), 153–161.	261–269
Notes on Fourier expansions (II), <i>J. London Math. Soc.</i> <b>21</b> , (1946), 264–267.	271–274
On absolute convergence of multiple Fourier series (with Otto Szász), <i>Trans. Amer. Math. Soc.</i> <b>61</b> , (1947), 36–53.	275–293
A uniqueness theorem for eigenfunction expansions, <i>Proc. Nat. Acad. Sci. U.S.A.</i> <b>33</b> , (1947), 76–77.	295–297
Some results on double Fourier series (with K. Chandrasekharan), <i>Duke Math. J.</i> <b>14</b> , (1947), 731–753.	299–321
Postscript to a Tauberian theorem (with C. T. Rajagopal), <i>Quart. J. Math., Oxford Ser.</i> <b>18</b> , (1947), 193–196.	323–326
An extension of a Tauberian theorem of L. J. Mordell (with C. T. Rajagopal), <i>Proc. London Math. Soc. (2)</i> <b>50</b> , (1948), 242–255.	327–340
Notes on Fourier expansions III. Fourier Stieltjes Series, <i>Amer. J. Math.</i> <b>71</b> , (1949), 60–66.	341–348
Some properties of the eigenfunctions of the Laplace-operator on Riemannian manifolds (with Å. Pleijel), <i>Canadian J. Math.</i> <b>1</b> , (1949), 242–256.	349–364
Zeta functions on the sphere, <i>J. Indian Math. Soc. (N.S.)</i> <b>13</b> , (1949), 41–48.	365–371
A generalization of Epstein Zeta functions. With a supplementary note by Hermann Weyl, <i>Canadian J. Math.</i> <b>1</b> , (1949), 320–327.	373–380

Expansion in eigenfunctions of the membrane problem, <i>Proceedings of the symposium on Spectral Theory and Differential Problems</i> , Oklahoma Agricultural and Mathematical College, Stillwater, Oklahoma, (1951), 317–323.	381–386
Lattice point problems and eigenvalue problems, <i>Proceedings of the symposium on Spectral Theory and Differential Problems</i> , Oklahoma Agricultural and Mathematical College, Stillwater, Oklahoma, (1951), 325–332.	387–394
Zeta functions on the unitary sphere, <i>Canadian J. Math.</i> <b>4</b> , (1952), 26–30.	395–399
Eigenfunctions on Riemannian manifolds, <i>J. Indian Math. Soc. (N. S.)</i> <b>17</b> , (1953), 159–165.	401–406
A note on typical means (with K. Chandrasekharan), <i>J. Indian Math. Soc. (N. S.)</i> <b>18</b> , (1954), 107–114.	407–412
On the structure of unitary symplectic groups, <i>J. Indian Math. Soc. (N. S.)</i> <b>19</b> , (1955), 105–120.	413–425
Hilbert algebras, <i>Proc. Internat. Congress Math.</i> , Edinburgh (1958), 407–411, Cambridge University Press (1960).	427–430
On the product of Dirichlet series, <i>J. London Math. Soc.</i> <b>37</b> , (1962), 90–102.	431–443
Convexity theorem for absolute summability, <i>Proc. Nat. Inst. Sci. India</i> , Part A <b>28</b> , (1962), 347–351.	445–450
On the multiplication of Dirichlet series, <i>Math. Z.</i> <b>79</b> , (1962), 44–52.	451–460
Summability of eigenfunction expansions, <i>Math. Z.</i> <b>83</b> , (1964), 321–335.	461–478
A note on summability by Riesz means, <i>Indian J. Math.</i> <b>9</b> , (1967), 473–476.	479–481
