

## HOW TO PREPARE POSTERS

Poster presentation is mainly aimed to provide longer period of time for the author(s) of papers to explain their findings to the interested participants. This will result in better interaction between the authors and those interested in the work. Each presenter will be provided 2 hard boards of size (2ft X 1.5 ft) to display the basic definitions, main results etc. Font and the size may be decided by the author, but it should be visible clearly. The authors may bring the materials printed in papers or flexi sheets . Specific time will be allotted for poster presentation during the conference. Authors are expected to be present and explain the contents to the interested participants.
