Preface	iv
Members on the Advisory Board	v
List of Participants	vi–viii
Some Omega Results and Related Questions Connected to R. Balasubramanian’s Mathematical Work <i>S. D. Adhikari and D. S. Ramana</i>	1–11
Professor R. Balasubramanian: The Man and The Mathematician <i>R. Thangadurai</i>	13–17
On the Distribution Modulo One of the Mean Values of Some Arithmetical Functions, II <i>Jean-Marc Deshouillers and Henryk Iwaniec</i>	19–27
An Alternative Proof on Four-Dimensional Zero-Sums <i>Christian Elsholtz</i>	29–36
The Distribution of Values of Logarithmic Derivatives of Quadratic Dirichlet $L$ -Functions <i>Mariam Mourtada and V. Kumar Murty</i>	37–50
On a Conjecture of Minkowski on the Product of Non-Homogeneous Linear Forms <i>Madhu Raka</i>	51–62
Identities for the Ramanujan Tau Function and Certain Convolution Sum Identities for the Divisor Functions <i>B. Ramakrishnan and Brundaban Sahu</i>	63–75
Some Remarks on the Discrete Uncertainty Principle <i>M. Ram Murty</i>	77–85
A Generalisation of a Theorem of Littlewood <i>Ayyadurai Sankaranarayanan</i>	87–91

A Note on Generalized Euler-Briggs Constants	<i>Sanoli Gun and Ekata Saha</i>	93–104
Conjecture of Pomerance for Prime Powers	<i>N. Saradha</i>	105–110
On Norm form Diophantine Equations	<i>S. Subburam and R. Thangadurai</i>	111–122
Some Problems of Elliptic Curves in Number Theory	<i>Jorge Jiménez-Urroz</i>	123–135
Solving Simultaneously Thue Equations in the Almost Totally Imaginary Case	<i>Claude Levesque and Michel Waldschmidt</i>	137–156
A Diophantine Problem with Prime Variables	<i>Alessandro Languasco and Alessandro Zaccagnini</i>	157–168
