

Contents

An Extremal Problem in Combinatorial Number Theory <i>Sukumar Das Adhikari</i>	1–11
Combinatorial Properties of n -Colour Compositions <i>A. K. Agarwal</i>	13–28
Partial Theta Identities of Ramanujan, Andrews, and Rogers-Fine Involving the Squares <i>Krishnaswami Alladi</i>	29–53
On the $K(n)$ -Invariants of a Supersingular Representation of $GL_2(\mathbb{Q}_p)$ <i>U. K. Anandavardhanan and Gautam H. Borisagar</i>	55–75
The Discovery of Ramanujan’s Lost Notebook <i>George E. Andrews</i>	77–88
Ramanujan and Quasi-Modular Forms <i>R. Balasubramanian and S. Gun</i>	89–98
Two Quotients of Theta Functions and Arithmetic Identities for 3-Cores <i>Nayandeep Deka Baruah and Kallol Nath</i>	99–110
The Circle and Divisor Problems, and Ramanujan’s Contributions through Bessel Function Series <i>Bruce C. Berndt, Sun Kim and Alexandru Zaharescu</i>	111–127
On q -Difference Equations for Partitions without K -Sequences <i>Kathrin Bringmann, Jeremy Lovejoy and Karl Mahlburg</i>	129–137
Recent Work on the Partition Function <i>Jan Hendrik Bruinier, Amanda Folsom, Zachary A. Kent and Ken Ono</i>	139–151
Some Remarks on the Resnikoff-Saldaña Conjecture <i>Soumya Das and Winfried Kohnen</i>	153–161
Ramanujan’s Ingenious Method for Generating Modular-Type Transformation Formulas <i>Atul Dixit</i>	163–179

Ramanujan-Type Formulae for $1/\pi$: The Art of Translation <i>Jesús Guillera and Wadim Zudilin</i>	181–195
On Ramanujan Graphs and Complexes <i>Wen-Ching Winnie Li</i>	197–211
On the q -Partial Differential Equations and q -Series <i>Zhi-Guo Liu</i>	213–250
Shifted Convolution of Divisor Function d_3 and Ramanujan τ Function <i>Ritabrata Munshi</i>	251–260
The Partition Function Revisited <i>M. Ram Murty</i>	261–279
Ramanujan and Prime Numbers <i>V. Kumar Murty</i>	281–299
Recent Progress on the Exterior Square L -Function of GL_n <i>Ravi Raghunathan</i>	301–322
Comparison Results for Certain Periods of Cusp Forms on GL_{2n} over a Totally Real Number Field <i>A. Raghuram</i>	323–334
Representation of Integers as Chromatic Sums of Primes <i>D. S. Ramana</i>	335–346
Aspects of Elliptic Hypergeometric Functions <i>V. P. Spiridonov</i>	347–361
Some Problems of ‘Partitio Numerorum’: Hybrid Expressions <i>R. C. Vaughan</i>	363–385
From Highly Composite Numbers to Transcendental Number Theory <i>Michel Waldschmidt</i>	387–397
Orbital Integrals and Dedekind Zeta Functions <i>Zhiwei Yun</i>	399–420
