

# Table of contents

<b>Foreword</b> .....	<i>i</i>
<b>Preface</b> .....	<i>iii</i>
<b>Felicitatation Messages</b> .....	<i>iv</i>
<b>Zero-sum problems in combinatorial number theory</b> .....	<i>1</i>
<i>Sukumar Das Adhikari and Purusottam Rath</i>	
<b>A generalization of Agarwal's theorem</b> .....	<i>15</i>
<i>C. Adiga, N. Anitha and J. H. Han</i>	
<b>Probabilistic number theory and random permutations:</b>	
<b>Functional limit theory</b> .....	<i>19</i>
<i>Gutti Jogesh Babu</i>	
<b>Contributions to the theory of the Lerch zeta-function</b> .....	<i>29</i>
<i>R. Balasubramanian, S. Kanemitsu and H. Tsukada</i>	
<b>Irreducible polynomials over number fields</b> .....	<i>39</i>
<i>Jasbir S. Chahal and M. Ram Murty</i>	
<b>On a conjecture of Andrews - III</b> .....	<i>45</i>
<i>Chandrashekara B.M., Padmavathamma and Raghavendra, R.</i>	
<b>Davenport constant and non-Abelian version of</b>	
<b>Erdős-Ginzburg-Ziv theorem</b> .....	<i>57</i>
<i>W.D. Gao and R. Thangadurai</i>	
<b>Extreme values of <math> \zeta(1 + it) </math></b> .....	<i>65</i>
<i>Andrew Granville and K. Soundararajan</i>	
<b>On moments of <math> \zeta(\frac{1}{2} + it) </math> in short intervals</b> .....	<i>81</i>
<i>Aleksandar Ivić</i>	
<b>On product partitions and asymptotic formulas</b> .....	<i>99</i>
<i>I. Kátai and M.V. Subbarao</i>	
<b>The distribution of integers with given number of prime factors</b>	
<b>in almost all short intervals</b> .....	<i>115</i>
<i>I. Kátai and M.V. Subbarao</i>	

<b>On nonvanishing infinite sums</b> .....	121
<i>N. Saradha</i>	
<b>Powers in arithmetic progressions (III)</b> .....	131
<i>T.N. Shorey</i>	
<b>Maximal order of certain sums of powers of the logarithmic function</b> .....	141
<i>V. Sitaramaiah and M.V. Subbarao</i>	
<b>On Ramachandra's contributions to transcendental number theory</b> .....	155
<i>Michel Waldschmidt</i>	
<b>Primes in almost all short intervals and the distribution of the zeros of the Riemann zeta-function</b> .....	181
<i>Alessandro Zaccagnini</i>	
<b>Author Index</b> .....	193
